Our curiosity mission

Imagine. Build. Test. Improve.

Connect the story to a question we can investigate.

Pause at a yellow note

What could make your bridge stronger?

Talk to a partner. Point to a clue. More than one idea is welcome.

Make a prediction

I think ___ because ___.

Draw or tell your idea before testing. A prediction is not a promise.

Investigate together

Build across a 15 cm gap. Roll the same cars one at a time. Change one design feature and compare.

Follow your teacher’s instructions and use the student handout.

Show your evidence

I noticed ___. That tells me ___.

Compare your prediction with what happened. What stayed the same? What changed?

A new question

Next time I would ___ because ___.

Share one useful clue and one way a teammate helped.
