My Sparx control panel

Fixing Sparx • Name: _____ Date: _____

MISSION: Draw a lead to its matching port. Use the shape and number as well as color. Then make a PAPER power card that says ON. This is a pretend robot, not real wiring.

● RED CIRCLE	1 ● PORT
■ BLUE SQUARE	2 ■ PORT
▲ GREEN TRIANGLE	3 ▲ PORT
★ YELLOW STAR	4 ★ PORT

Our paper power card: ON / OFF All four leads match: YES / NOT YET

A clue I would check first is...

Draw a happy Sparx when every check passes.

My troubleshooting log

Fixing Sparx • Keep thinking. Keep trying.

Teacher mission: A / B / C Partners: _____

Clue I noticed	ONE thing I changed	Retest: ready / not yet

What finally helped Sparx? Show the evidence.

A troubleshooting habit I can use again...

Finish together: Look closely → choose one change → test → use the result.
